

**Program Feasibility Review & Application Data Sheet**

Composite Sealing Systems Division (CSS)  
7664 Panasonic Way | San Diego, CA 92154  
Ph: 619-661-7000

**Request - Provide as much information as is available.**

<b>SECTION 1 – Proposal Print Provided and/or “Make to Print”</b>		
	<b>Program application commercial info</b>	<b>Response(s)</b>
1	Customer/end user	
1a	Name and title of person filling out this form	
1b	Business email	
1c	Best phone number to reach you	
2	Program name. Where part is used on application	
3	Is this a new design or make to print	
4	If make to print, is design frozen or is there design flexibility? (change tolerances, materials, etc)	
5	Program launch date, or confirm if already existing in production	
6	Estimated annual usage and RFQ quantity	
7	Number and timing of proto/qual parts, if required	
8	Start of production and program length in years	
9	Estimated target price range needed to win if known	
10	Are there any standards and / or specifications relative to: cleanliness, tolerances, coatings, paint, deburring, material specifications or approved suppliers, restricted special machining processes, etc.?	
11	Any there special packaging requirements?	
<b>SECTION 2 – Additional info. if no print or not “Make to Print”</b>		
	<b>Operational Considerations</b>	
12	What is the media being sealed?	
13	Maximum & Minimum operating temperatures?	
14	Maximum & Minimum operating pressures?	
	<b>Seal Design Considerations</b>	
15	Any thickness constraints on the seal? (Thread engagement considerations, concerns, etc.)	
16	Any special finishes required? (Paint, Anodize, etc.)	
17	Are special locating features (pins, bolt retention, etc.) requested, desired, or needed?	
	<b>Mating Hardware Considerations</b>	
18	Can any changes be made to the mating hardware if needed for improved sealing? (assuming considering solution based upon provided hardware flanges)	
19	What materials are the mating hardware made of? (Concerns are relative to Galvanic Corrosion)	
	Additional Comments:
